

1. When you click a point in Standard Mode the default 'snap' is to the nearest integer value.

2. To check that the **Snap Settings**, In Standard Mode you will see these two icons in the top toolbar.

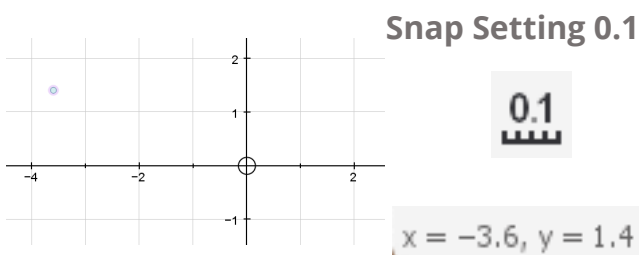

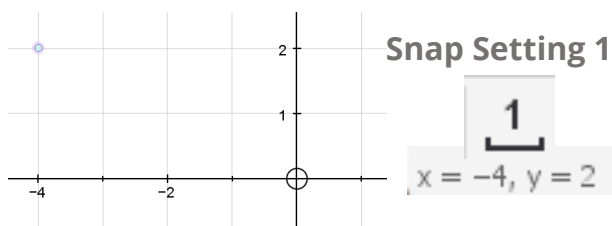

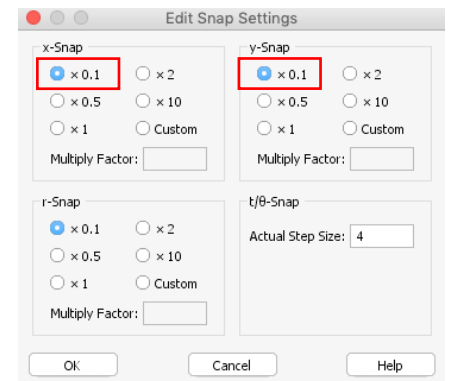

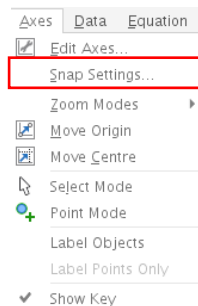

You can switch between **Grid Snap Ones** and **Grid Snap Tenths** by clicking either icon.

3. You can also change from the **Axes** Menu.

This will allow you to change the **Snap Settings**

Here are what the settings might look like:

Snap Setting Custom 0.05
